Data Flow Diagram (DFD)

A **Data Flow Diagram (DFD)** shows how data moves through the system and how different components interact with each other.

Level 0 (Context Diagram)

This is the **high-level view** of the system.

External Entities

- Customer / User
- Support Agent
- Admin

Process

- Ticket Management System

Data Flow

- Customer submits a **support ticket** to the system.
- System stores ticket information in the **database**.
- System automatically assigns the ticket to a **support agent**.
- Support agent updates ticket status after resolving the issue.
- Customer receives **status updates and solutions**.

Level 1 (Detailed DFD)

Processes

- Ticket Creation
- Ticket Assignment
- Ticket Processing
- Ticket Resolution & Update

Data Stores

- Ticket Database
- Agent Database

Level 2 (User Stories)

User stories describe **what users need from the system** and help developers understand system requirements.

User Story 1 - Customer

As a customer, I want to create a support ticket so that I can report my issue and get help from the support team.

User Story 2 - Customer

As a customer, I want to check the status of my ticket so that I know whether my issue is being resolved.

User Story 3 - Support Agent

As a support agent, I want to receive tickets based on my expertise so that I can resolve issues efficiently.

User Story 4 - Support Agent

As a support agent, I want to update the ticket status after solving the problem so that customers are informed about the solution.

User Story 5 - Admin

As an administrator, I want to monitor all tickets and agent workloads so that I can manage support operations effectively.
